PROFESSIONAL SUMMARY

Computer Science student and Python developer with strong foundational skills in machine learning, computer vision, and full-stack web development. Experienced in building automation routines and integrating generative AI APIs into scalable backend applications.

TECHNICAL SKILLS

Programming: Python, C++, JavaScript, SQL

AI & Libraries: Google Gemini API, NLP, YOLOv8, OpenCV

Web & Backend: React.js, Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, SQLite, Redis

Tools: Git, GitHub, VS Code, Postman

EXPERIENCE

Python Developer Intern — TechSoft Solutions

June 2024 – August 2024

- Developed Python scripts for internal automation and data processing tasks, applying Object-Oriented Programming (OOP) and Data Structures & Algorithms (DSA) principles to optimize legacy routines.
- Assisted senior engineers with code debugging, unit testing, and performance profiling across production scripts.

PROJECTS

SkillBridge — AI-Powered Interview Preparation Platform

React.js, Node.js, Express.js, MongoDB

- Developed a full-stack career preparation platform integrated with the Google Gemini API to analyze candidate resumes against job descriptions and generate structured interview questions.
- Implemented JWT authentication, role-based access, Redis caching, and an interactive practice simulator supporting MCQ, Technical, and Behavioral tracks.

AI Security & Attendance System

Python, YOLOv8, OpenCV, Flask

- Built an automated face detection and attendance logging application utilizing YOLOv8 and OpenCV for real-time processing.
- Created a Flask web interface connected to a local SQLite database for viewing student and employee check-in logs seamlessly.

EDUCATION

FAST National University of Computer and Emerging Sciences

2022 – 2026

Bachelor of Science in Computer Science (BS CS)

CGPA: 3.4 / 4.0
